## Q Template 2, for Tracking Gasoline Usage $Q$

Vehicle Name: $\qquad$

| A | B | C | D | E | F | G | H |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| At the Pump |  |  |  | Calculate |  |  |  |
| Date | Odom | Gallons | Cost | Days | Miles | Gal/Day | M/Gal |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
| TOTAL |  |  |  |  |  |  |  |
| GOAL |  |  |  |  |  |  |  |

Overall: Use one template each year of your tithing and one for each car in your household. Depending on how much you drive and how often you fill up, you may need a longer table.
Columns A-D: Hint: note down the entries for Columns A-D while you are at the pump and fill your tank. To get started, record just the odometer reading and date for a baseline. As with utilities, tracking cost (Column D) is optional and not the focus of your tithing.
Columns E-F: Calculate these by comparing the odometer readings and dates to the previous row, respectively. If the number of miles since the last fill-up is about twice as large as usual, you may have accidentally skipped a reading. In which case, you should guess, e.g. by doubling the number of gallons and the cost (Col. C and D) and leaving the missing odometer reading blank. :
Column G-H: Calculate Col. G by dividing Col. C by Col. E to see your average consumption. Your mileage is in Col H (divide Col F by Col. C). Both will vary with your highway vs. city driving.
TOTAL row: The numbers in $\mathrm{Col} \mathrm{C}, \mathrm{D}, \mathrm{E}$, and F in this row are simply the totals of each column. Compute Col G and H as before. You may want to do this after each refill, to monitor your progress.
GOAL row: Set you tithing goal for the coming year before you begin tracking, instructions for the first year and for subsequent years are given at the beginning of Tracking section.
